

**Did you know?** Large amounts of carbon dioxide are captured and incorporated into a tree's wood as it grows. When a tree dies a natural death, its carbon is returned to the atmosphere. But when wood is fashioned into furniture that will last many lifetimes—as Stickle furniture does—that carbon is locked away. About half the weight of any piece of wood furniture is carbon, representing a substantial volume of CO<sub>2</sub>. [www.stickley.com/green](http://www.stickley.com/green)

# STICKLEY®

Influenced by the arts and crafts masters of Scotland, the Stickle Edinburgh Collection transforms your space into something extraordinary yet comfortable. While making a strong statement on its own, this is also a collection that "plays well with others". Mix and match with pieces from other Stickle collections (from Mission to Metropolitan) to create an eclectic room setting.
